

LIST OF TABLES

TABLE	TITLE	PAGE
3.1	Tests selection	64
3.2	Intra class co-efficient of correlation on selected variables	65
3.3	Arrangement of items in test forms with respect to factors	70
3.4	Conversion of raw score to sten score	70
4.1	Mean and standard deviation of basketball and handball players at different topography on physical fitness components	81
4.2	Analysis of variance on the selected physical fitness of basketball players at different topography	88
4.3	The Scheffe's test for the differences between paired means of basketball with different topography on selected physical fitness	89
4.4	Analysis of variance on the selected physical fitness of handball players at different topography	91
4.5	The Scheffe's test for the differences between paired means of handball with different topography on selected physical fitness	92
4.6	Mean and standard deviation of basketball and handball players at different topography on personality traits	95
4.7	Analysis of variance on the selected personality traits of basketball players at different topography	113
4.8	The Scheffe's test for the differences between paired means of basketball with different topography on sixteen personality traits	115
4.9	Analysis of variance on the selected personality traits of handball players at different topography	117
4.10	The Scheffe's test for the differences between paired means of handball with different topography on sixteen personality traits	119
4.11	Independent t-test on the selected physical fitness and personality traits of basketball and handball players at different topography	121
