

<b>Table No</b>	<b>List of Tables</b>	<b>Page No</b>
I	Selection tests	48
II	Intra class co-efficient of correlation on selected variables	50
III	Mean gains and losses between pre and post test scores of specific skill training group	71
IV	Mean gains and losses between pre and posttest neuromuscular training group	73
V	Computation of analysis of covariance for the pre, post and adjusted posttest on speed	75
VI	Scheffe's post hoc test for the difference among paired means of experimental and control groups on speed	77
VII	Computation of analysis of covariance for the pre, post and adjusted posttest on agility	79
VIII	Scheffe's post hoc test for the difference among paired means of experimental and control groups on agility	81
IX	Computation of analysis of covariance for the pre, post and adjusted posttest on flexibility	83
X	Scheffe's post hoc test for the difference among Paired means of experimental and control groups on flexibility	85
XI	Computation of analysis of covariance for the pre, post and adjusted posttest on arm strength	87
XII	Scheffe's post hoc test for the difference among Paired means of experimental and control groups on arm strength	89
XIII	Computation of analysis of covariance for the pre, post and adjusted posttest on leg explosive power	91
XIV	Scheffe's post hoc test for the difference among Paired means of experimental and control groups on leg explosive power	93
XV	Computation of analysis of covariance for the pre, post and adjusted posttest on anaerobic power	95
XVI	Scheffe's post hoc test for the difference among Paired means of experimental and control groups on anaerobic power	97

<b>Table No</b>	<b>List of Tables</b>	<b>Page No</b>
XVII	Computation of analysis of covariance for the pre, post and adjusted posttest on maximal oxygen uptake	99
XXVIII	Scheffe's post hoc test for the difference among paired means of experimental and control groups on maximal oxygen uptake	101
XIX	Computation of analysis of covariance for the pre, post and adjusted posttest on short serve	103
XX	Scheffe's post hoc test for the difference among Paired means of experimental and control groups on short serve	105
XXI	Computation of analysis of covariance for the pre, post and adjusted posttest on long serve	107
XXII	Scheffe's post hoc test for the difference among Paired means of experimental and control groups on long serve	109
XXIII	Computation of analysis of covariance for the pre, post and adjusted posttest on forehand clear	111
XXIV	Scheffe's post hoc test for the difference among Paired means of experimental and control groups on forehand clear	113
XXV	Computation of analysis of covariance for the pre, post and adjusted posttest on back hand clear	115
XXVI	Scheffe's post hoc test for the difference among Paired means of experimental and control groups on back hand clear	117
XXVII	Computation of analysis of covariance for the pre, post and adjusted posttest on volleying ability	119
XXVIII	Scheffe's post hoc test for the difference among Paired means of experimental and control groups on volleying ability	121
