

<b>Table No</b>	<b>List of Tables</b>	<b>Page No</b>
I	Demographic profile of Subjects	61
II	Showing the stratified random sampling design	62
III	Showing the selected variables of this study	63
IV	Co-efficient of correlation of selected variables	67
V	Sowing the selection of tests	69
VI	Sowing the selection of tests cont.	70
VII	Showing the descriptive analysis of selected variables	91
VIII	ANOVA table showing the comparison of acceleration locomotion and declaration phases on selected independent variables in 100m sprint	95
IX	Scheffe's post hoc test of selected independent variables in acceleration locomotion and declaration phases in 100m sprint	96
X	Showing the results of Pearson correlation analysis of 100m sprinting performance and selected independent variables	99
XI	Showing the results of correlation matrix of block phase variables and acceleration phase variables	106
XII	Showing the results of correlation matrix of acceleration phase variables and locomotion phase variables	108
XIII	Showing the results of correlation matrix of locomotion phase variables and deceleration phase variables	109
XIV	Showing the correlation t value of the	111

	selected independent variables and 100-meter sprinting performance	
XV	Showing the partial correlation analysis of block phase variables and 100m sprinting performance	114
XVI	Showing the partial correlation analysis of acceleration phase variables and 100m sprinting performance	116
XVII	Showing the partial correlation analysis of locomotion phase variables and 100m sprinting performance	119
XVIII	Showing the partial correlation analysis of deceleration phase variables and 100m sprinting performance	121
XIX	Showing the Multiple Regression	124
XX	Showing the ANOVA	125
XXI	Regression analysis of prediction equation on 100m sprinting performance	126
XXII	Showing the predicted performance 100m sprinters using derived prediction equation model	131
XXIII	Showing the average speed difference of predicted and observed 100m sprinting performance	132
