

| <b>Table</b> | <b>LIST OF TABLES</b>   | <b>Page No</b> |
|--------------|---|----------------|
| I            | Test and retest intra class correlation   | 89             |
| II           | Training schedule for Step aerobic exercise   | 91             |
| III          | Training schedule for Basic aerobic exercise  | 102            |
| IV           | Computation of Analysis of Covariance on Erythrocyte Sedimentation Rate                       | 123            |
| V            | Scheffe's post hoc test analysis on Erythrocyte Sedimentation Rate                            | 124            |
| VI           | Computation of Analysis of Covariance on Red blood cell                                       | 127            |
| VII          | Scheffe's post hoc test ordered Adjusted final mean difference of Red blood cell              | 128            |
| VIII         | Computation of Analysis of Covariance on White blood cell                                     | 131            |
| IX           | Scheffe's post hoc test ordered Adjusted final mean difference of White blood corpuscles cell | 132            |
| X            | Computation of Analysis of Covariance on Hemoglobin rate                                      | 135            |
| XI           | Scheffe's post hoc test ordered Adjusted final mean difference of Hemoglobin rate             | 136            |
| XII          | Computation of Analysis of Covariance on Triglycerides  | 139            |
| XIII         | Scheffe's post hoc test ordered Adjusted final mean difference of Triglycerides               | 141            |
| XIV          | Computation of Analysis of Covariance on Low density lipoprotein                              | 144            |
| XV           | Scheffe's post hoc test ordered Adjusted final mean difference of Low density lipoprotein     | 145            |
| XVI          | Computation of Analysis of Covariance on High density lipoprotein                             | 149            |
| XVII         | Scheffe's post hoc test ordered Adjusted final mean difference of High density lipoprotein    | 150            |
| XVIII        | Computation of Analysis of Covariance on Super oxide dismutase                                | 154            |
| XIX          | Scheffe's post hoc test ordered Adjusted final mean difference of Super oxide dismutase       | 155            |
