

LIST OF TABLES

TABLE	TITLE	PAGE
I	Selection of Variables	
II	Selection of Tests	
III	Analysis of covariance of the data on intermodal perception of pre and post test scores of pranayama practices, auditory stimulation and control groups	96
III - A	The scheffe's test for the differences between paired means on intermodal perception	97
III - B	The mean and standard deviation values on intermodal perception at the end of 10 th month, 11 th month and 12 th month scores of pranayama practices, auditory stimulation practices and control groups	100
III - C	The two way analysis of variance on intermodal perception of pranayama practices, auditory stimulation practices and control groups at three different stages of periods	101
III - D	The simple effect values of all three groups (rows) at three different stages of testing periods (columns) on intermodal perception	103
III - E	The scheffe's test for the differences between paired means of groups on intermodal perception (11 th Month)	105
III - F	The scheffe's test for the differences between paired means of groups on intermodal perception (12 th Month)	106
III - G	The scheffe's test for the differences between paired means of groups on intermodal perception (Pranayama Practices Group)	107
III - H	The scheffe's test for the differences between paired means of groups on intermodal perception (Auditory Stimulation Practices Group)	108
IV	Analysis of covariance of the data on auditory perception of pre and post test scores of pranayama practices, auditory stimulation and control groups	110
IV - A	The scheffe's test for the differences between paired means on auditory perception	111
IV - B	The mean and standard deviation values on auditory perception at the end of 10 th month, 11 th month and 12 th month scores of pranayama practices, auditory stimulation practices and control groups	114

TABLE	TITLE	PAGE
IV – C	The two way analysis of variance on auditory perception of pranayama practices, auditory stimulation practices and control groups at three different stages of periods	115
IV – D	The simple effect values of all three groups (rows) at three different stages of testing periods (columns) on auditory perception	116
IV – E	The scheffe’s test for the differences between paired means of groups on auditory perception (11 th Month)	118
IV – F	The scheffe’s test for the differences between paired means of groups on auditory perception (12 th Month)	119
IV – G	The scheffe’s test for the differences between paired means of groups on auditory perception (Pranayama Practices Group)	120
IV - H	The scheffe’s test for the differences between paired means of groups on auditory perception (Auditory Stimulation Practices Group)	121
V	Analysis of covariance of the data on visual recognition memory of pre and post test scores of pranayama practices, auditory stimulation and control groups	123
V - A	The scheffe’s test for the differences between paired means on visual recognition memory	125
V – B	The mean and standard deviation values on visual recognition memory at the end of 10 th month, 11 th month and 12 th month scores of pranayama practices, auditory stimulation practices and control groups	127
V – C	The two way analysis of variance on visual recognition memory of pranayama practices, auditory stimulation practices and control groups at three different stages of periods	128
V – D	The simple effect values of all three groups (rows) at three different stages of testing periods (columns) on visual recognition memory	129
V – E	The scheffe’s test for the differences between paired means of groups on visual recognition memory (11 th Month)	131
V – F	The scheffe’s test for the differences between paired means of groups on visual recognition memory (12 th Month)	132
V – G	The scheffe’s test for the differences between paired means of groups on visual recognition memory (Pranayama Practices Group)	133

TABLE	TITLE	PAGE
V - H	The scheffe's test for the differences between paired means of groups on visual recognition memory (Auditory Stimulation Practices Group)	134
VI	Analysis of covariance of the data on tactile perception of pre and post test scores of pranayama practices, auditory stimulation and control groups	136
VI - A	The scheffe's test for the differences between paired means on tactile perception	137
VI - B	The mean and standard deviation values on tactile perception at the end of 10 th month, 11 th month and 12 th month scores of pranayama practices, auditory stimulation practices and control groups	140
VI - C	The two way analysis of variance on tactile perception of pranayama practices, auditory stimulation practices and control groups at three different stages of periods	141
VI - D	The simple effect values of all three groups (rows) at three different stages of testing periods (columns) on tactile perception	142
VI - E	The scheffe's test for the differences between paired means of groups on tactile perception (11 th Month)	144
VI - F	The scheffe's test for the differences between paired means of groups on tactile perception (12 th Month)	145
VI - G	The scheffe's test for the differences between paired means of groups on tactile perception (Pranayama Practices Group)	146
VI - H	The scheffe's test for the differences between paired means of groups on tactile perception (Auditory Stimulation Practices Group)	147
