

LIST OF TABLES

Table No.	TABLES	Page No.
3.1	Criterion measures	95
3.2	Intra class correlation co-efficient obtained for test - re test Scores	97
4.1	Computation of 't' ratio on speed of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	117
4.2	Analysis of covariance on pre, post and adjusted post test means on speed of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	118
4.3	Scheffe's post hoc test for the differences between the paired and the adjusted post-test means of speed	119
4.4	Computation of 't' ratio on flexibility of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	122
4.5	Analysis of covariance on pre, post and adjusted post test means on flexibility of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	123
4.6	Scheffe's post hoc test for the differences between the paired and the adjusted post-test means of flexibility	125
4.7	Computation of 't' ratio on agility of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	128
4.8	Analysis of covariance on pre, post and adjusted post test means on agility of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	129
4.9	Scheffe's post hoc test for the differences between the paired and the adjusted post-test means of agility	131

4.10	Computation of 't' ratio on muscular strength endurance of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	134
4.11	Analysis of covariance on pre, post and adjusted post test means on muscular strength endurance of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	135
4.12	Scheffe's post hoc test for the differences between the paired and the adjusted post-test means of muscular strength endurance	137
4.13	Computation of 't' ratio on resting pulse rate of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	140
4.14	Analysis of covariance on pre, post and adjusted post test means on resting pulse rate of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	141
4.15	Scheffe's post hoc test for the differences between the paired and the adjusted post-test means of resting pulse rate	143
4.16	Computation of 't' ratio on Vo ₂ max of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	146
4.17	Analysis of covariance on pre, post and adjusted post test means on Vo ₂ max of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	147
4.18	Scheffe's post hoc test for the differences between the paired and the adjusted post-test means of Vo ₂ max	149
4.19	Computation of 't' ratio on anaerobic power of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	152
4.20	Analysis of covariance on pre, post and adjusted post test means on anaerobic power of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	153

4.21	Scheffe's Post hoc test for the differences between the paired and the adjusted post-test means of anaerobic power	155
4.22	Computation of 't' ratio on breath holding time of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	158
4.23	Analysis of covariance on pre, post and adjusted post test means on breath holding time of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	159
4.24	Scheffe's post hoc test for the differences between the paired and the adjusted post-test means of breath holding time	161
4.25	Computation of 't' ratio on stress of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	164
4.26	Analysis of covariance on pre, post and adjusted post test means on stress of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	165
4.27	Scheffe's Post hoc test for the differences between the paired and the adjusted post-test means of stress	167
4.28	Computation of 't' ratio on anxiety of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	170
4.29	Analysis of covariance on pre, post and adjusted post test means on anxiety of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	171
4.30	Scheffe's Post hoc test for the differences between the paired and the adjusted post-test means of anxiety	173
4.31	Computation of 't' ratio on aggression of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	176
4.32	Analysis of covariance on pre, post and adjusted post test means on aggression of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	177

4.33	Scheffe's Post hoc test for the differences between the paired and the adjusted post-test means of aggression	179
4.34	Computation of 't' ratio on mood state of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	182
4.35	Analysis of covariance on pre, post and adjusted post test means on mood state of pilates training group, plyometric training group, combination of pilates and plyometric training group and control group	183
4.36	Scheffe's post hoc test for the differences between the paired and the adjusted post-test means of mood state	185
