

## LIST OF TABLES

<b>Table</b>		<b>Page No</b>
I	Test Selection	75
II	Reliability Co-Efficient of Correlation of Test-Retest Scores	76
III	General Structure of Training Programs	79
IV	Submaximal Aerobic Exercise Training Programme	81
V	Maximal Aerobic Exercise Training Programme	84
VI	Dependent ‘t’ test on selected Musculoskeletal Fitness and Cardiopulmonary Parameters of active smokers of Submaximal Aerobic Exercise Group	96
VII	Dependent ‘t’ test on selected Musculoskeletal Fitness and Cardiopulmonary Parameters of active smokers of Maximal Aerobic Exercise Group	98
VIII	Computation of analysis of covariance of Pre, Post and Adjusted post test on Muscular Strength of experimental and control group	101
IX	Scheffe’s Post hoc test for the differences between Paired means of experimental and control Groups on Muscular Strength	102
X	Computation of analysis of covariance of Pre, Post and Adjusted post test on Muscular Endurance of experimental and control group	106
XI	Scheffe’s Post hoc test for the differences between Paired means of experimental and control Groups on Muscular Endurance	108
XII	Computation of analysis of covariance of Pre, Post and Adjusted post test on Flexibility of experimental and control group	112
XIII	Scheffe’s Post hoc test for the differences between Paired means of experimental and control Groups on Flexibility	114

## LIST OF TABLES

**Page No**

XIV	Computation of analysis of covariance of Pre, Post and Adjusted post test on Resting Heart Rate of experimental and control group	119
XV	Scheffe's Post hoc test for the differences between Paired means of experimental and control Groups on Resting Heart Rate	120
XVI	Computation of analysis of covariance of Pre, Post and Adjusted post test on Maximal Oxygen Uptake of experimental and control group	125
XVII	Scheffe's Post hoc test for the differences between Paired means of experimental and control Groups on Maximal Oxygen Uptake	126
XVIII	Computation of analysis of covariance of Pre, Post and Adjusted post test on Forced Vital Capacity of experimental and control group	131
XIX	Scheffe's Post hoc test for the differences between Paired means of experimental and control Groups on Forced Vital Capacity	132
XX	Computation of analysis of covariance of Pre, Post and Adjusted post test on Forced Expiratory Volume in one second of experimental and control group	137
XXI	Scheffe's Post hoc test for the differences between Paired means of experimental and control Groups on Forced Expiratory Volume	138
XXII	Computation of analysis of covariance of Pre, Post and Adjusted post test on Maximal Voluntary Ventilation experimental and control group	143
XXIII	Scheffe's Post hoc test for the differences between Paired means of experimental and control Groups on Maximal Voluntary Ventilation	144
